APPLICATIONS CREATED

BOOSTRAP

An E-commerce store application that utilizes a full LAMP stack with React.js

- Developed with **React.js** to create a single page application along with **JSX**

- Created the back-end with **PHP**, used **MySQL** to store all products and user info.

- Used **Endpoints** to communicate with back-end, along with **JSON** to transport data.

- Referenced **Figma** for initial **HTML5** skeleton and design.

- Used **PostMan** to test **HTTP API** endpoints. **Chrome Dev Tools** for debugging.

MEMORY MATCH

A responsive puzzle game that uses the foundation of web technologies

- Written in **Procedural** format, utilized **JavaScript** and **jQuery** to create functionality.

- Applied standard **CSS3, FlexBox** and **HTML5** to make the app **Mobile Responsive**.

- Debugged application using **Chrome Dev Tools** along with the use of **VSCode.**

EDUCATION\CERTIFICATES

- MiraCosta College (Chemical Engineer)

- LearningFuze

  ❖ Remogy, API hackathon, SGT(CMS)

  ❖ 80hrs per week
